## Eigenschappen

E2 stacking bin / Euro meat container - green.  
Dimensions: 600 x 400 x H 200 mm

Green version of the red Euro meat container in pool design - with the same proven product properties

The upper rim of the bin is fitted with ventilation openings and integrated open handgrips on all 4 sides

The rest of the bin has a closed design with a smooth base

Highly suitable for products that need to be ventilated or cooled

Designed with minimal ribbing - for easy cleaning and optimal hygiene

Fitted with a studded area on all 4 sides for temporary stickers

Made from 100% virgin granulate - freezer-resistant - food-safe

Options: coversheets - other colours: blue - yellow - white - grey - red - brown - black

# Omschrijving

## E2 stacking bin in green

E2 plastic stacking bin (600 x 400 x H 200 mm - 35 liter) in green. Green version of the E2 Euro meat container in pool design (red). With a ventilated upper rim for optimal cooling.

### Application

The green E2 stacking bin is identical to the red pool version of the E2 bin. The green version is also used as a meat bin, but usually internally or in closed external circuits, for example with one specific customer. The special colour is used to distinguish between different departments or applications. This colour variant is also widely used as a universal fresh produce crate for products where ventilation and cooling play an important role, particularly food products. Thanks to their Euronorm format, E2 stacking bins can easily be used with standardised mobile plastic trolleys and plastic pallets. Our EURO H1 pallet with red GS1 approval mark was developed as a standardised pallet for the E2 bin. Other plastic pallets from our range are also excellent load carriers for this green E2 stacking bin.

### Product details

The E2 bin has a ventilated upper rim with integrated handgrips on all 4 sides. This ensures optimal ventilation and cooling of fresh products, as well as easy handling. The bin is fitted with studded areas for temporary stickers.

Thanks to its standardised dimensions, the E2 Euro meat container can be used seamlessly with all other Euronorm stacking bins, as well as with standardised mobile plastic trolleys or roll containers. Our EURO H1 plastic pool pallet (1200 x 800 mm) with GS1 approval mark was also developed for the safe transport of E2 stacking bins. For users of industrial-size pallets (1200 x 1000 mm), we offer the H3 plastic pallet. All types of Euronorm bins can also be transported safely on this pallet. In all cases, the Euronorm dimensions ensure safe and efficient use.
