| Stacking height (mm)             | 212                                 |

## Eigenschappen

Modern grey stacking crate in LIGHT version.  
Dimensions: 600 x 400 x H 220 mm

The LIGHT series is fully perforated - both the walls and the base

The perforations ensure optimal ventilation - helping to prevent spoilage of fresh produce such as fruit and vegetables

Condensation and leaking moisture are drained away through the open construction

The stacking crates can be stacked with each other and also with Euronorm bins without lids

With open handgrips for optimal carrying comfort

Food-safe and hygienically designed - with minimal ribbing

Options: printing - hinged lid

# Omschrijving

## LIGHT stacking crate

Stacking crate from the **LIGHT series** in a fully **perforated design** - both the walls and the base. The dimensions are **Euronorm (600 x 400 x H 220 mm - 43 liter)**. This means the stacking crate can be stacked with all other Euronorm bins and crates.

### Applications

Our LIGHT series is a modern product line with rounded corners and minimal ribbing, which also reduces the overall weight. This makes LIGHT stacking crates particularly **light and easy to handle** and very **user-friendly**.

As the stacking crates are fully perforated - both the walls and the base - they are ideal for products that need to **ventilate**, such as fruit and vegetables. Any **condensation** or leaking moisture is **drained away** through the open construction.

The open construction also provides good **visibility of the contents**. This is often desirable in both professional and private use. Our LIGHT stacking crates are ideal for private use, while being **stronger and more durable** than standard household crates.
