Bedrukking mogelijk

Stacking crate - 600 x 400 x H 87 mm - finely perforated - 2 open handgrips - grid base - orange

Product specificaties

External dimensions (L x W x H)	600 × 400 × 87 mm
Internal dimensions (L x W x H)	568 × 368 × 73 mm
Capacity	15 liter
Handles	Open
Sidewalls	Perforated
Material	HDPE
Article number	30.175.17.0117
Weight (kg)	0,8 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Orange
Bottom	Perforated, reinforced (base implementation no. 17)
Quantity per pallet	100
Stacking height (mm)	76

Eigenschappen

Practical orange stacking crate from the BASIC BREAD LINE. Dimensions 600 x 400 x H 87 mm

Fully perforated - both the walls and the base

High stability thanks to strategically positioned reinforcements in the walls and base construction

Fitted with two open handgrips for easy handling

Thanks to the Euronorm format, easily stackable with other Euronorm bins and crates and compatible with standardised mobile plastic trolleys and pallets

Food-safe and hygienically designed

Options: printing (short sides) - loose-fit lid - coversheets

Omschrijving

Practical stacking crate in Euronorm format (600 x 400 x H 87 mm). Finished in **orange** and part of our widely used **BASIC BREAD LINE** for the **bakery sector**.

The stacking crate features **fine perforations** in both the walls and the base. This ensures **optimal ventilation**, allowing the contents to 'breathe' and any condensation to drain away quickly. As the **stability** of the crate is also important, the walls have been reinforced at strategic points and the wall perforations are arranged in a smart and proven grid pattern. Special attention has also been given to **base reinforcement**. The open base is reinforced on the underside with a **very robust grid**, with perforations designed as T-profiles. This strong construction results in a particularly robust crate with a high load capacity, while remaining relatively lightweight and easy to handle.

Thanks to its **standardised dimensions** (600 x 400 mm), the stacking crate can be stacked with all other **Euronorm stacking bins and crates** and is perfectly compatible with **standardised pallets**, **mobile plastic trolleys** and **roll containers**. This makes logistics particularly efficient and helps prevent unnecessary loss of space.

Application

Thanks to the **fine perforations**, the stacking crate is widely used for **bakery products**, as well as many other foodstuffs. These products need to 'breathe' to help prevent mould formation. Our **BASIC BREAD LINE** is an excellent choice for these applications. Another advantage of the perforations is the high **visibility** of the contents. Products inside the crate can therefore be identified easily. This also makes our BASIC BREAD LINE crates highly suitable for **warehouse applications** in the bakery sector.
