| Stacking height (mm)             | 125                                 |

## Eigenschappen

Modern grey lidded bin in LIGHT design.  
Dimensions: 600 x 400 x H 145 mm (including lid)

The LIGHT series has a fully perforated design - both walls and base

The perforations ensure optimal ventilation - to prevent spoilage of fresh products such as fruit and vegetables

Condensation and leaking moisture are drained away through the open construction

When open, the lid is removable (if designed without hinge reinforcements)

Lidded bins can be stacked with each other, as well as with Euronorm bins without a lid

With open handgrips for optimal carrying comfort

Food-safe and hygienically designed - with minimal ribbing

Options: printing - hinge reinforcements - different bin height

# Omschrijving

## LIGHT stacking box with lid

Lidded crate from the LIGHT series in a fully perforated design - both walls and base. Fitted with a hinged lid with two snap-slide closures. The dimensions are Euronorm (600 x 400 x H 145 mm - 22 liter). This allows the lidded bin to be stacked with all other Euronorm bins and crates.

## Applications

Our LIGHT series is a modern product line with rounded corners and minimal ribbing, which also reduces the weight. This makes LIGHT lidded crates particularly easy to handle and very user-friendly. Because the lidded crates are fully perforated - both walls and base - they are ideal for applications with products that need ventilation, such as fruit and vegetables. Any condensation or leaking moisture is drained away through the open construction. In addition, the open construction of the lidded crate ensures visibility of the contents. This is often required in both commercial and private use. Our LIGHT lidded crates are ideal for private use, but stronger and more durable than crates for household use.
